Okay, so we know that the sun is bad for us -- makes us age prematurely, causes skin cancer and on and on -- but we also know that we like how we *look* when we're tan. Hence the conundrum a lot of us face. To tan or not to tan? *THAT* is the question.

The answer, my prom-going friends, comes to us by way of Melbourne, Florida - it's [SUNBRUSHED](#) - the ultimate solution in sunless tanning.

Without using the harmful UV rays of tanning beds or messy, streaky creams, Sunbrushed is an innovative liquid formula that is applied with a micro-fiber cloth AT HOME! It's easy to apply and brings almost-immediate results that last for days.

The SUNBRUSHED product line is comprised of five things...

- The Tanning Kit, which contains formula for six full body tans, along with the micro-fiber application cloth
- The Single-Application Travel Pack, including the micro-fiber cloth and gloves
- The eight-pack SUNBRUSHED pre-tan exfoliant, to properly prepare skin beforehand. Made from the finest of organic ingredients the exfoliant is used to cleanse, moisturize, and rejuvenate skin
- The Tan Extender to rehydrate skin, keeping it smooth while prolonging the life of your tan. Made with Aloe and Rose Hips oils, the Tan Extender is the key to maintaining your SUNBRUSHED glow
- The SUNBRUSHED cosmetic quality sunscreens provide excellent protection against UVA & UVB rays. The sunscreens contain Aloe, Shea Butter & Vitamin-E to help moisturize skin as it tans

All this for \$49.99! Crazy, huh?

And, we have **FIVE SUNBRUSHED** kits to give away to 5 lucky readers. Enter your info and go get tan!
