### Sunbrushed Tan Fooled Snowbirds (Ramsay review)

by Deborah Ramsay

evalu8.org's Deborah Ramsay reviews the Sunbrushed Tan kit:

**What THEY say:** You Can Tan, LLC, is a corporation that develops, retails and manufactures the famous Sunbrushed™ product line. The corporation was founded by CEO Brian Low and established in Melbourne, Florida. The product is produced, bottled and labelled in Melbourne as well.

The whole Sunbrushed™ team is dedicated to the continued success of the Sunbrushed™ brand as well as providing the customer with the highest quality products, first-class customer service and satisfaction.

With enough tanning formula for six full-body tans, you can now achieve that professional looking tan in the privacy of your own home. This revolutionary self tanning process will create a tan equal to or better than salon airbrush tanning. Kit contains: Sunbrushed™ pre-tan exfoliant (made from generous amounts of the finest organic ingredients. Not only does it cleanse skin, but also moisturizes, leaving skin rejuvenated.); Sunbrushed™ tanning solution (revolutionary Wash-On Formula) and micro-fibre cloth & gloves).

**What WE say:** The kit consists of Sunbrushed tanning solution, Exfoliator, and Moisturizer. Natural-looking bronzed skin in a few minutes without travelling south or visiting a salon for an air-brushed tan is easy-peasy with this product. No streaks, no orangeness and a "healthy-looking" colour are a must for me as a personal trainer who wears shorts and t-shirts year round.

In three easy steps, I applied the exfoliator during my shower, then sponged my body with microfibre wash cloth soaked in colour and moisturized daily with a rich lotion to maintain the tan which can last up to 10 days! It takes about 20 minutes in total -- just enough time for me to vacuum the house in the nude while the colour dries (multi-tasking to the max!). The colour fooled my snowbird friends at the gym -- they accused me of sneaking off to Hawaii!

We found information on where-to-buy these items available online at [sunbrushed.com](http://sunbrushed.com) for a cost of \$49.90 (USD).

For living up to our expectations after rigorous testing, this product receives a star rating of five.
